

CROSS-INDEX TO PEDIGREES

The following index helps broodmare owners easily locate stallions for inbreeding or outcrossing. In it, the names of all stallions included in the advertising section of this book (the statistical pages) appear in capital letters. A four-generation pedigree is shown for each of these horses.

The index further includes the names of all horses or mares with as many as one generation of ancestors shown in the pedigrees of the advertised stallions in this book. The figure in parentheses indicates the number of generations shown. No figure after the name in small letters indicates only one generation shown.

Example: GUN RUNNER. A four generation pedigree is shown in the statistical pages for **GUN RUNNER** and all other featured stallions, which are designated in capital letters and bold font.

Example: One generation of ancestors for A.P. Indy is shown in the statistical pages under great-grandson **CALIFORNIA CHROME**, two generations for grandson **ORB**, and three generations for his son **BERNARDINI**. Thus, if a mare owner wants to make a mating involving A.P. Indy, the previously named stallions are available; if he wants to avoid inbreeding to A.P. Indy, he knows that a mating with those stallions will be unsatisfactory.

NAME IN PEDIGREE OF

A

Abbey's Missy - Caleb's Posse(3).
 Abbey's Phone - Caleb's Posse(2).
 Above Perfection - Union Jackman(2).
 Absolutelyfabulous (IRE) - Magician (IRE)(3).
