

TAIL-MALE SIRE LINES

The following pages show the male lines descending from Eclipse and Matchem, two of the three 18th century English stallions to which all Thoroughbreds today may be traced in tail-male ancestry. All stallions whose names appear in italics have statistical pages in the 2018 *Stallion Register*. These statistical pages are also available for sires listed on Stallion Register Online. Visit the SRO for results, entries, and other daily updates on individual stallions, be sure to download the [Global Stallions](#) app through the App Store or Google Play for access to the most comprehensive mobile information about the world's leading stallions.
